

**ARMOR  
AFTERMARKET**

# Installation Services

Armor Aftermarket offers installation services for all Armor Metal Group products

We offer two types of installation services to fit your needs

## Turn-Key Installation

- Team of Armor service technicians will travel to your site to provide installation service.
- Installation can be scheduled at your convenience to minimize downtime at your facility.
- A series of run-off tests is performed with your team to ensure all equipment is installed and operating properly and efficiently.
- We provide training of your staff on how to operate the equipment.
- Warranty is validated and begins when the equipment installation is completed to your satisfaction per our terms and conditions.

## Start-Up Supervised Installation

- Armor Field Supervisor will travel to your site to supervise your team's installation.
- Save money by using your workforce.
- Series of run-off tests are performed to ensure equipment is installed properly.
- Provide training of your staff on how to operate the equipment.
- Warranty is validated and begins when the equipment installation is completed to your satisfaction per our terms and conditions.
